

Bydi(Suzhou)Mechatronics Technologies Co.,Ltd.

Add: No. 3099 Chang'an Road, Wujiang District, Suzhou City, Jiangsu Province, China
Contact: Tel: +86-512-63150221

Vision & Mission

To become a global leader in the electromechanical industry. By leveraging technological innovation and exceptional service, we deliver higher-quality, smarter one-stop integrated solutions for electromechanical products to clients worldwide, enabling the world to experience the allure of "Chinese Quality".

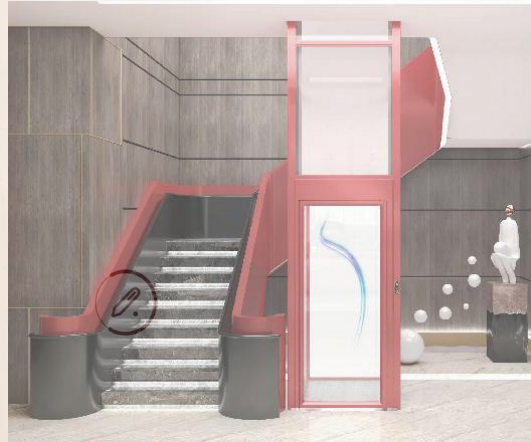

Villa Elevator (home lift)

家用电梯系列

Home platform elevator series

ENJOYYOUR LIFE

Product Features

- ① Integrated steel-aluminum structure shaft
- ② Diameter 1300mm
- ③ Minimum top floor height 2900mm
- ④ Exceptional 10% space utilization
- ⑤ Hidden connections for the shaft frame
- ⑥ Integrated one-touch rescue dialing function
- ⑦ User one-touch self-rescue function
- ⑧ Rising speed 0.3-0.63m/s

PARAMETER LIST

Shaft Outer Diameter	1300	1400	1500	1600	1700
Shaft Outer Diameter	1300	1400	1500	1600	1700
Car Inner Diameter	1000	1050	1200	1200	1250
Door (Automatic Center-opening Door)	1	1	1	700*200 0	700*200 0
Door (Automatic Sliding Door)	700*2000	700*2000	700*200 0	700*200 0	700*200 0
Top Floor Height ≥	2900mm (without car roof); 3200mm (with car roof)				
Pit Depth ≥	150mm				
Maximum Lifting Height	20m

Screw home elevator

Driving Mode	Screw-nut mother drive control
Control System	SSID Control System intelligent control system
Door Lock System	Electronic and mechanical safety interlock
Silent Brake System	SSG Brake System silent fixed new generation brake
Hydraulic Guide Shoe System	Silent operation, anti-skid
Automatic Lubrication System	Continuous lubrication, prolong core component service life
Wireless Emergency Call	Can store 3 emergency contact numbers, one-key dialing
Automatic Levelling in Power Failure	Double protection (storage battery + mechanical handle)
Touch-type External Call	Precise control, easy to operate
Built-in Functions	SAPS safety system, ID card reader, BASS battery monitoring system, OLP overload protection, UPS standby power supply emergency drop, etc.
Door Lock System	Electronic and mechanical safety interlock
Emergency Brake Button	Respond to all emergency situations
Control Panel	Touch panel, precise control, easy to operate
Platform Safety Edge	Touch emergency stop
Operating Speed	Standard: 0.15m/s; Optional: 0.3m/s
Hoistway Profile	Adopt high-standard (6005 - T5) aviation-grade aluminum profile
Hoistway Glass	Use double-layer laminated explosion-proof glass 5m + 0.76mm + 5mm product
Sustainability	95% of products can be recycled
Technical Standards	Refer to European standard EN81 - 4, European Machinery Directive 2006/42/EC

Aesthetic language

The combination of industrial design and aesthetic language creates elevator products with more beauty and comfort. The emotional design brings you a dual visual experience. GEH160 combines art and emotion. Integrate into the space. Give you a perfect user experience.

Be different and have outstanding performance

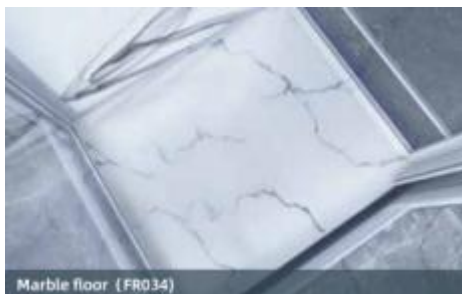

Breaking through tradition, leading steel belt traction drive

The Glift platform innovatively uses steel belt traction drive, which has significantly improved the speed, comfort, stability and safety of operation, and can better carry travel.

Hydraulic type home elevator

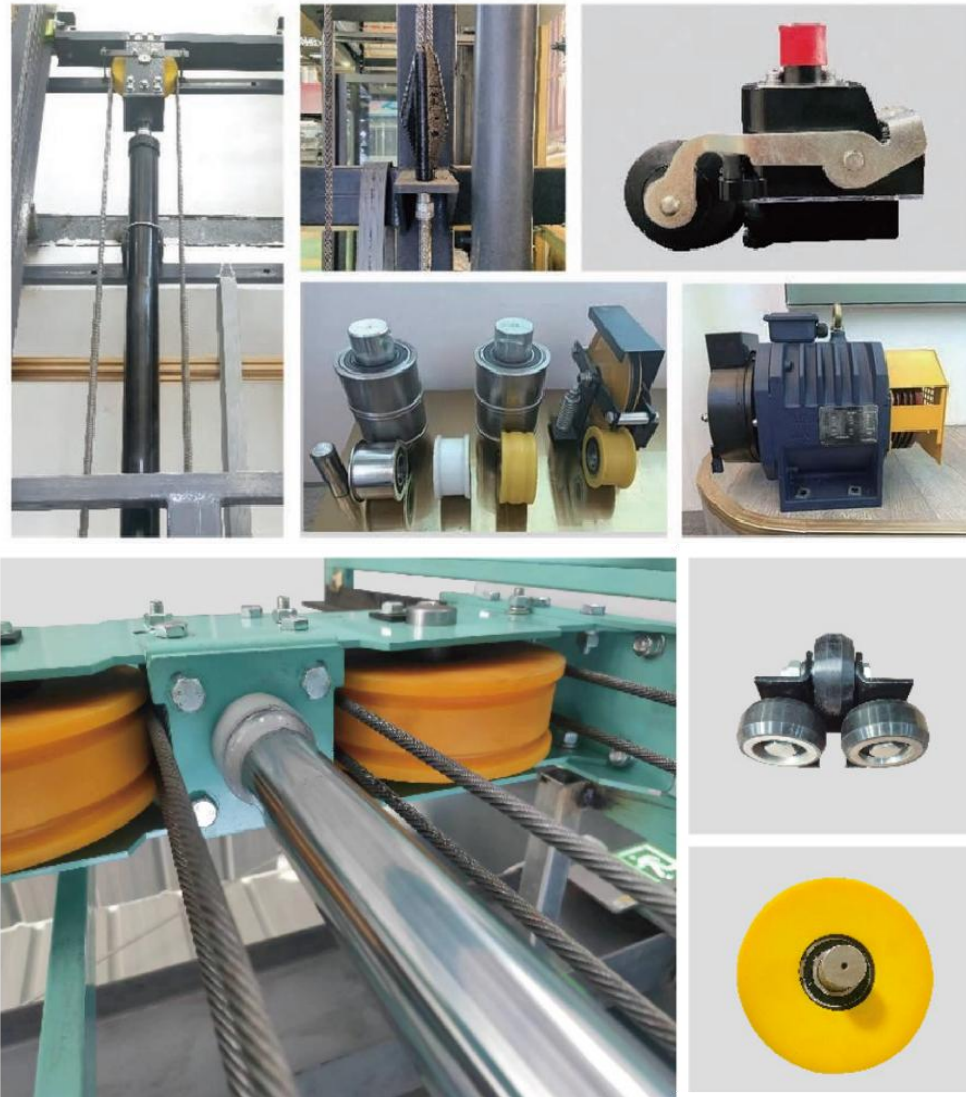

Hydraulic domestic elevator, with high-performance hydraulic system and advanced control technology, its high-precision proportiona valve can realize stepless speed regulation, and the elevator runs smoothly.

Features of hydraulic type home elevator

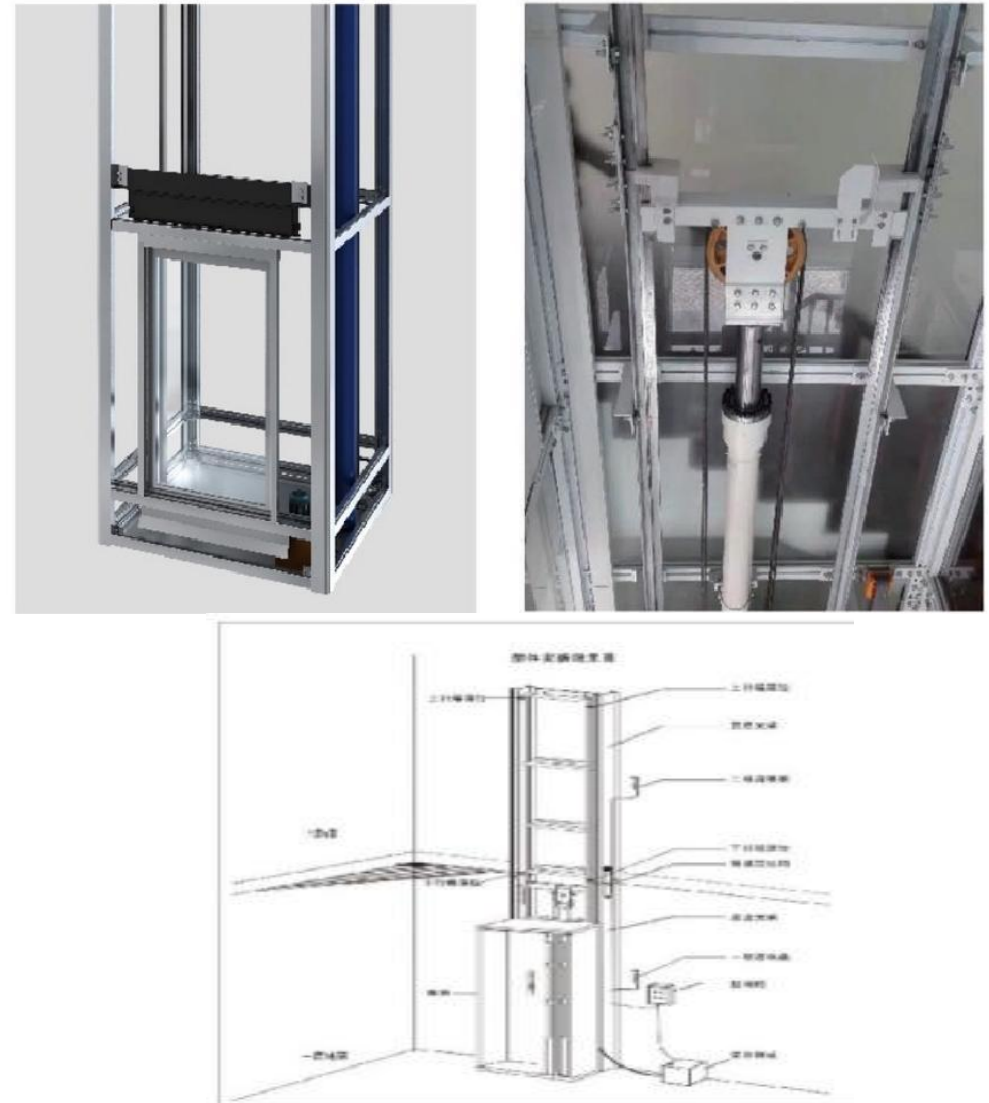

- It requires no high cost/high requirement machine room at upper well. It can be as high as the roof.
- Small floor space: the hydraulic transmission system relies on oil pipe to transmit power. There is no pit in the inorganic room, and the minimum installation space is only 700×800mm.
- High utilization rate of well: Hydraulic elevator needs no counterweight device. It can enhance utilization rate of the well area.
- Low intensity requirements of the well structure: The vertical loads such as car dead-weight, load of hydraulic elevator etc. act upon the wellground through the hydraulic cylinder. It has low requirements towards the building performance of the well wall & top.

BYDI-Residential Elevator Solutions

Traction Elevators

Our traction elevators offer efficient and stable performance, balancing speed with safety for residential use.

Screw Drive Elevators

Screw drive elevators provide quiet and comfortable operation, ideal for homes where noise is a concern.

Hydraulic Elevators

Hydraulic elevators are designed for space-saving installations, ensuring reliability in various home settings.

Customized Elevator Options

We deliver tailored solutions for villas, duplexes, and homes, ensuring all residential elevator needs are addressed.

After-sale Service

Professional team

Service line

Convenient service

Professional maintenance

Offering best solution

We firmly believe that superior quality is not the only factor to make a product reach a perfect level. Only with a high standard service assurance can truly create the maximum value for our customers and customers can indeed enjoy the beyond-value service brought by this product. With the service concept of "ubiquitous service, all for customers", we provide after sale service guarantee for 24 hours a day, 365 days a year.

Standardization Globally unified service standard, designed to provide you with professional services

Professionalization Well-trained service team to provide you with a full range of service solutions

Systematization Strict and complete service process to ensure perfect service is close to you

Personalization Hierarchical service scheme, close to your needs, win value for you
